"Confidence level" is a restored feature requested by readers. It is based on the preponderance of 8 indicators plus a dollop of judgment. Judgment is about direction, not about stops and targets. Low = 3 or fewer, medium = 4-6, and high = 6-8.

WE WENT LONG THE POUND AT THE GLOBEX OPEN 16440 AND HIT THE STOP AT 16406 FOR A LOSS OF 34 POINTS.

Error: We had a long position in the euro at 14622 that was not in the main positions section of yesterday's report. If we apply the stop and target POINTS to that position, we would have hit the target at 14669 for a gain of 47 points. The track record also shows the loss from the r-entry at 14688 that was stopped at 14646 for 42 points.

WE HIT THE STOP IN THE AUD AT 10683 FOR A LOSS OF 17 POINTS.

WE HIT THE STOP IN THE YEN AT 12459 FOR A LOSS OF 27 POINTS. WE WENT SHORT AT 12459 AND HIT THE STOP AT 12503 FOR A LOSS OF 44 POINTS.

WE WENT SHORT THE SF AT THE GLOBEX OPEN 11953 AND HIT THE STOP AT 11978 FOR A LOSS OF 25 POINTS.

WE WENT LONG THE CAD AT 10243 BUT HIT THE STOP AT 10221 FOR A LOSS OF 22 POINTS.

When the entry recommendation is the same as the CME close, enter at the Globex open or at the market when you get the report.

All prices on a FUTURES BASIS, nearest contract. We try to make the "Close" the Chicago pit session Settlement price.

- Current Position is long, short, or square (square means NO POSITION). Bold, italic points to new position today.
 - Stop is the recommended level to exit the current long or short position. If stop = close, execute as soon as possible.
 - Reenter is the recommended level to reenter in the Swing Direction. "NPR" means "no position recommended."
- If we carry a position from one day to another day, we change the stop and target to reflect changed conditions. Be sure to cancel the old stop and target.
- Entry Price is the price at which we initiated the current long, short or square position. Entry Date is the date on which the current position was entered.
- MTM (mark-to-market) is the number of points gained or lost between the current long or short position entry price and today's close.
- * Current position profit target is the recommended level to exit for a gain. If we have no position, we also have no profit target.
