"Confidence level" is a restored feature requested by readers. It is based on the preponderance of 8 indicators plus a dollop of judgment. Judgment is about direction, not about stops and targets. Low = 3 or fewer, medium = 4-6, and high = 6-8.

All prices on a FUTURES BASIS, nearest contract. We try to make the "Close" the Chicago pit session Settlement price.

- Current Position is long, short, or square (square means NO POSITION). Bold, italic points to new position today.
 - Stop is the recommended level to exit the current long or short position. If stop = close, execute as soon as possible.
 - Reenter is the recommended level to reenter in the Swing Direction. "NPR" means "no position recommended."
- If we carry a position from one day to another day, we change the stop and target to reflect changed conditions. Be sure to cancel the old stop and target.
- Entry Price is the price at which we initiated the current long, short or square position. Entry Date is the date on which the current position was entered.
- MTM (mark-to-market) is the number of points gained or lost between the current long or short position entry price and today's close.
- * Current position profit target is the recommended level to exit for a gain. If we have no position, we also have no profit target.
